

Structural Engineer

Growing professional services firm based in Newcastle
Rewarding work across a wide variety of industries
Achieve a great work life balance

Summary

Advitech is seeking a Structural Engineer to meet the increasing workload across our growing customer base. The position requires someone with sound understanding of Australian structural codes, and experience in design analysis, ideally within a heavy industry setting. Advitech offers excellent opportunities for career development, as well as great working conditions.

The Role

The role will involve the following key activities:

- Structural design and analysis
- Hands-on engineering investigations and structural assessments
- Report and proposal preparation
- Maintaining client relationships
- Working within a team environment

Essential

To be successful, you will possess the following:

- Degree qualification with 2-5 years' experience
- Design analysis experience
- Solid experience with design software such as SpaceGASS and TEDDS or Mathcad (Strand an advantage)
- Sound understanding of Australian structural codes
- Engineering investigation and report writing experience
- Excellent oral and written communication skills
- Current drivers licence

Desirable

The following additional skills would be advantageous:

- Experience working within heavy industry or with bulk materials
- Experience in a consulting environment

Position

Permanent Full Time
