

Novocom is an innovative company that designs and develops software-based business solutions which integrate hardware and software systems into a central platform to optimise business processes. We specialise in solutions for the mining, industrial, defence and environmental industries. Based in Newcastle, we offer excellent employment opportunities.

Systems Engineer

Summary

Novocom is seeking an engineer with experience in industrial automation and integrated software solutions. The role requires an innovative, creative individual with niche technical skills. This position offers excellent career development opportunities for someone who is self-motivated, organised and thrives on a challenge.

The Role

The role will involve the following key activities:

- Scoping, design and delivery of integrated business solutions
- Preparation of proposals, reports and related client deliverables
- Coordination of project resources, scopes of work, schedules and budgets
- Building and maintaining relationships with existing clients
- Developing new relationships with potential clients

Essential

To be successful, you will possess the following:

- Degree or trade qualification in electrical engineering or similar discipline
- 10+ years experience since graduation
- Skills and experience in industrial automation, control, communications software and hardware, and/or integration of software and hardware systems
- Product development skills
- Business development and customer relationship experience
- Effective communication skills
- Proven problem solving and data analysis skills
- Effective time management skills
- Commitment to safe work methods
- Current drivers' licence

Desirable

The following additional skills would be advantageous:

- Knowledge of C, C++, SQL, Linux
- Experience with SCADA systems
- Experience in environmental and/or process monitoring applications
- Experience working in an industrial field
