

POSITION DESCRIPTION

PROJECT ENGINEER

POSITION SUMMARY

Advitech is seeking an experienced project engineer for a site based role. The successful applicant will have 5-10 years engineering experience, and strong project engineering skills. This role will initially be offered as a full time casual position and will initially involve planning and defining the scope of work and estimating for a specific project within a process plant. This will be followed by involvement with design and implementation. There is potential for this role to continue beyond the current project into a longer term position.

The ideal candidate will be tertiary qualified, exhibit strong interpersonal and organisational skills, and be able to communicate and work effectively in an engineering environment. The successful applicant will be flexible and adaptable, and have demonstrated experience working on a variety of projects.
